Clark County Comp Planning

Note: Slope analysis based on 2003 contour data. Slope percentages derived from 20' contour intervals. Contours in some cases may not have been consistent. Contour lines in some areas may not have been present. Contour intervals generated from 30 meter U.S.G.S. Data Elevation Model (DEM) data. DEMs consist of a sampled array of elevations for a number of ground positions at regularly spaced intervals.

This map is offered as a general reference guide only. Neither warranty of accuracy is intended nor should any be assumed.
