

Subject: Reclaimed Water ROFC Power Supply – Anthem HOA & Country Club Coordination

Hello!

The City of Henderson, in conjunction with NV Energy, will be performing work on a power supply vault located in your HOA's area. This work will start in mid-January 2023 and construction may take approximately one to three months.

As indicated in the attached map, the "existing underground reclaimed water vault" is the vault location, at the northeast corner of the Anthem Parkway and Anthem Club Drive intersection. The project includes trenching new NVE conduit from the transformer (solid redline starting at the southwest corner of the intersection), setting a new NVE pedestal (orange square), trenching new COH conduit from the new pedestal to the existing COH pullbox, and pulling wire through the existing NV Energy conduit shown in dashed red line across Anthem Parkway to connect to the "existing underground reclaimed water vault." The red dashed line will not need any trenching, only pulling through wire in existing conduit. There will be minor construction activities in the vault area.

There is no action required from the HOA for these improvements. This project will include minimal disruptions to the residents nearby. Construction work hours are from 6am-6pm. The road won't be closed to through traffic and there may be flaggers to guide traffic. Also, since this is a reclaimed waterline and not the potable line, water services will not be disrupted.

We thank you for your understanding during construction. For more information, please visit <https://www.cityofhenderson.com/government/departments/utility-services> or with specific questions, please email utilitiescommunications@cityofhenderson.com

Sincerely,

Department of Utility Services
