

Subject: Reclaimed Water ROFC Power Supply – Sun City HOA Coordination

Hello!

The City of Henderson, in conjunction with NV Energy, will be performing work on a power supply vault located in your HOA's area. This work will start in mid-January 2023 and construction may take approximately one to three months.

As indicated in the attached map, the "existing Sun City ROFC Site" is the vault location, 1621 Preston Park Dr, parcel number is 191-12-197-006 on Preston Park Drive just north of the Preston Park Drive and Winslow Springs Drive intersection. The project includes pulling wire through the existing NV Energy conduit shown in dashed red, connecting to the existing NV Energy pull box in the sidewalk (red box), trenching new COH conduit (minimal – less than 10') shown in solid orange line, and setting a new COH service pedestal (filled orange square) to connect to the existing vault (labeled as "existing Sun City ROFC Site").

There is no action required from the HOA for these improvements. This project will include minimal disruptions to the residents nearby. Construction work hours are from 6am-6pm. The road won't be closed to through traffic and we can confirm there will be flaggers to guide traffic. Also, since this is a reclaimed waterline and not the potable line, water services will not be disrupted. Power services will be disrupted for potentially a few hours, however further coordination with NV Energy is needed to determine this.

We thank you for your understanding during construction. For more information, please visit <https://www.cityofhenderson.com/government/departments/utility-services> or with specific questions, please email utilitiescommunications@cityofhenderson.com

Sincerely,

Department of Utility Services
City of Henderson
